Oxalis 4.0

- support for multiple protocols

—

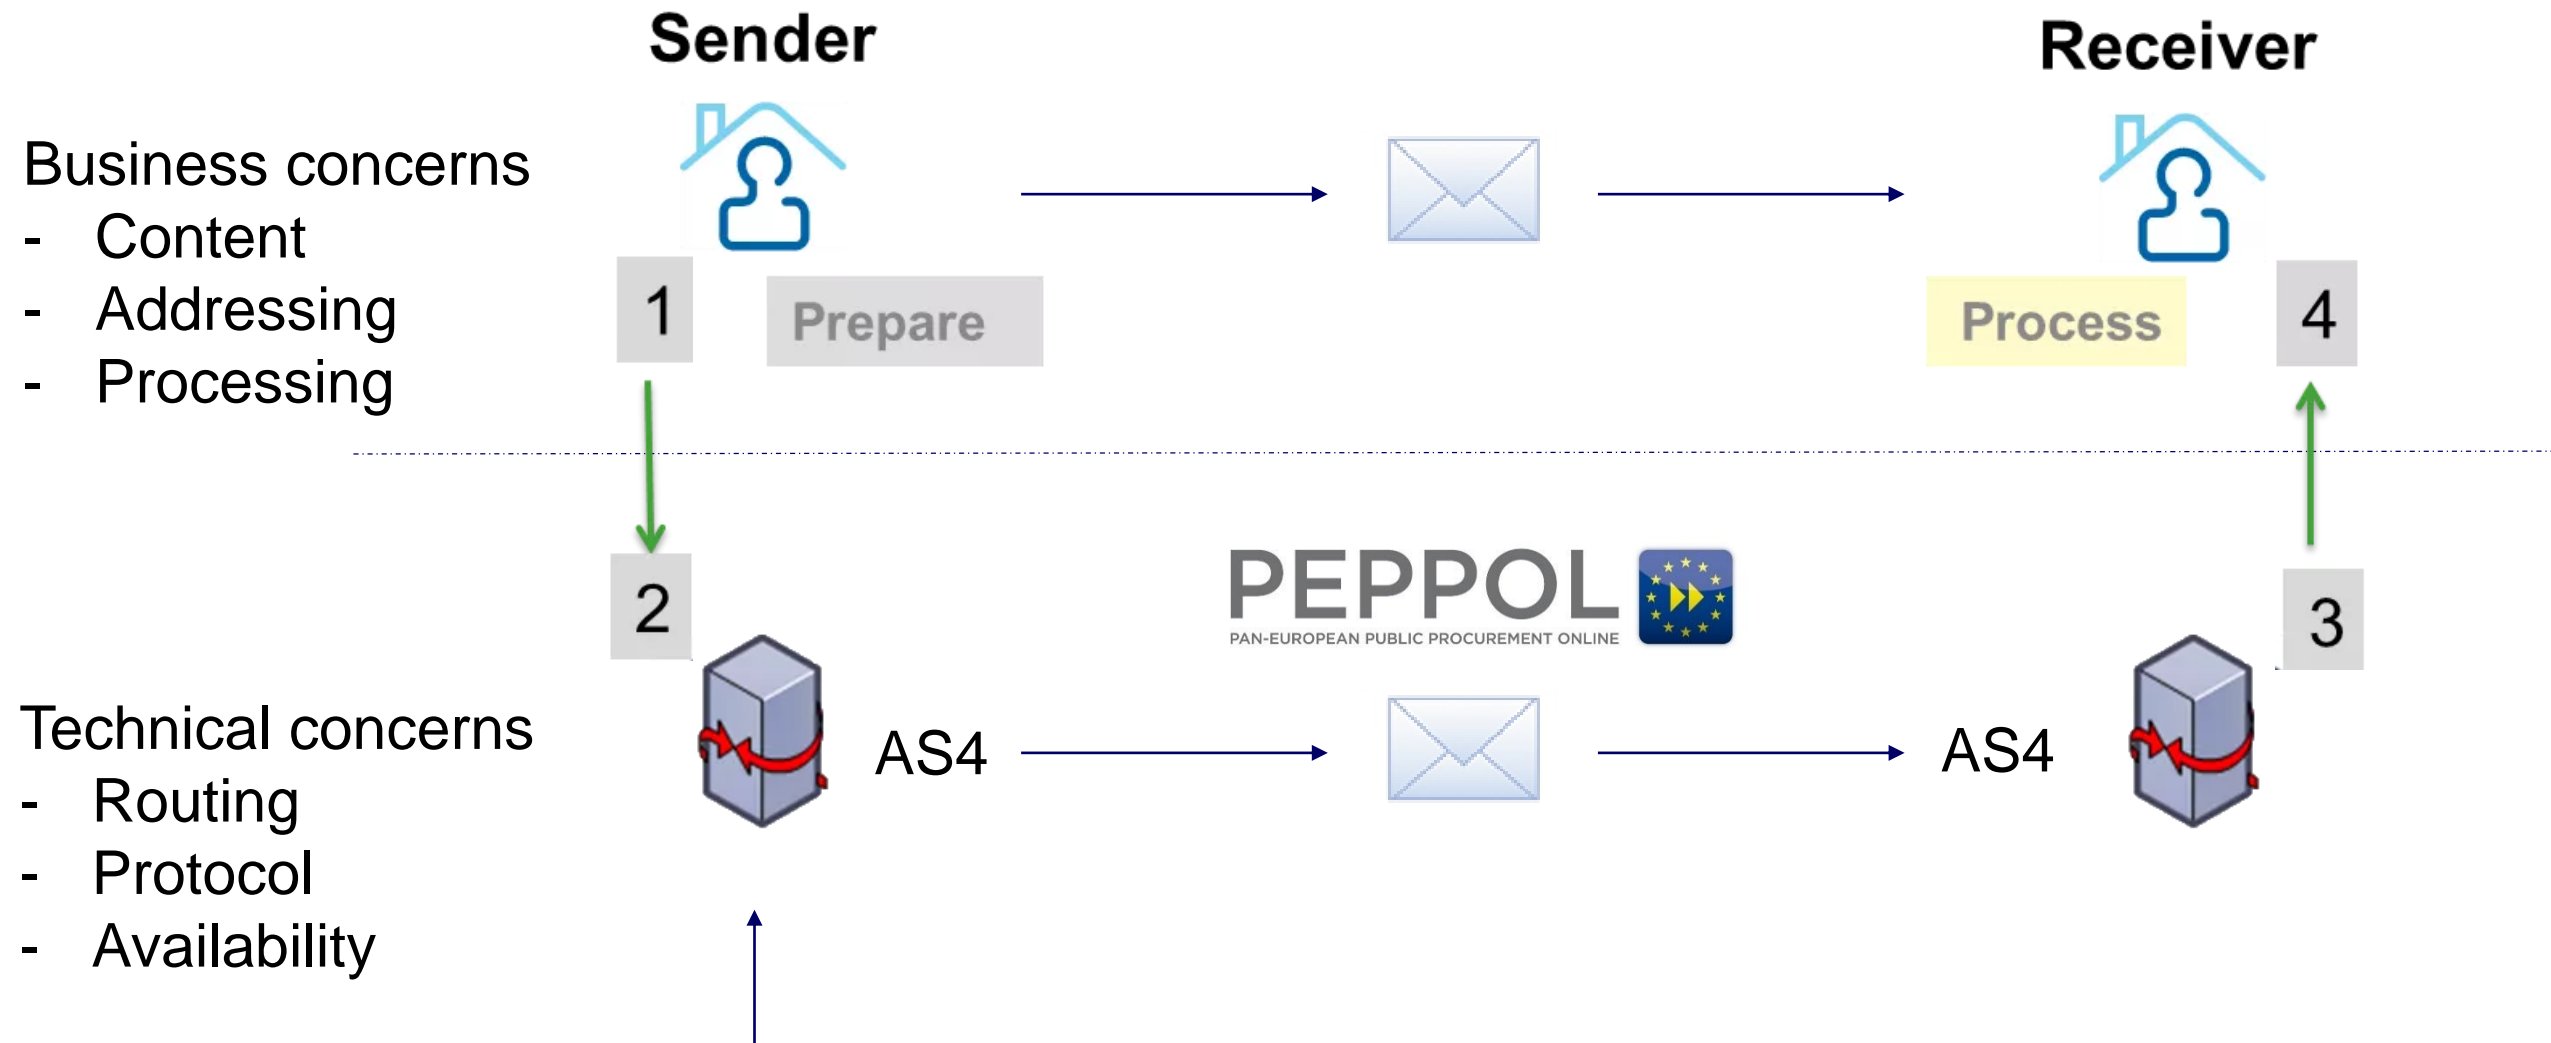

Rune Kjølraug
Lead Architect

What is AS4?

- “**AS4** (Applicability Statement 4) is a Conformance Profile of the OASIS ebMS 3.0 specification, and represents an open standard for the secure and payload-agnostic exchange of Business-to-business documents using Web services”
- PEPPOL AS4 profile is a subset of CEF eDelivery AS4 profile

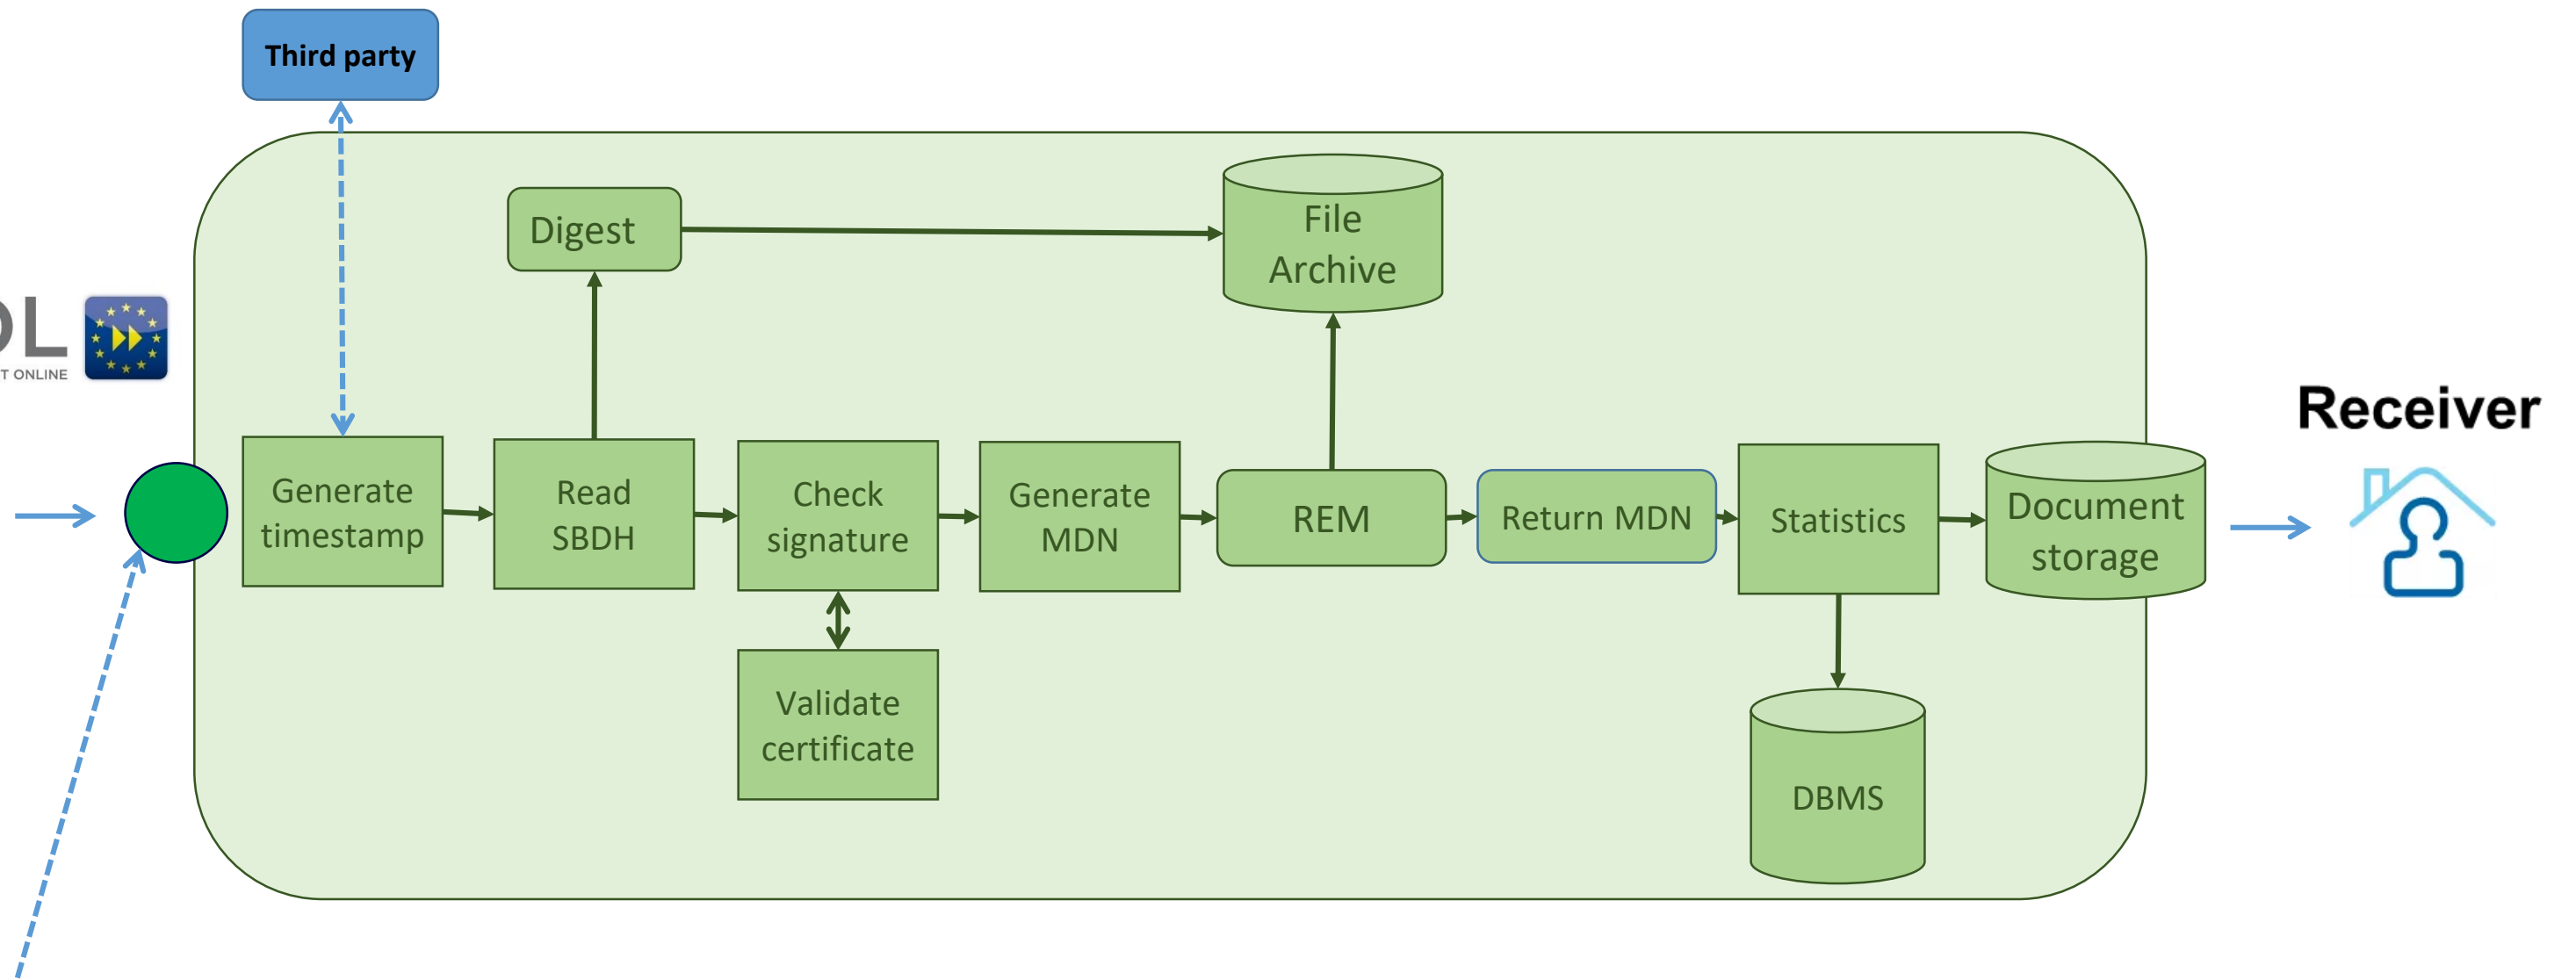

What is Oxalis?

Oxalis is an open source implementation of an accesspoint following the OpenPEPPOL specifications

Oxalis Inbound

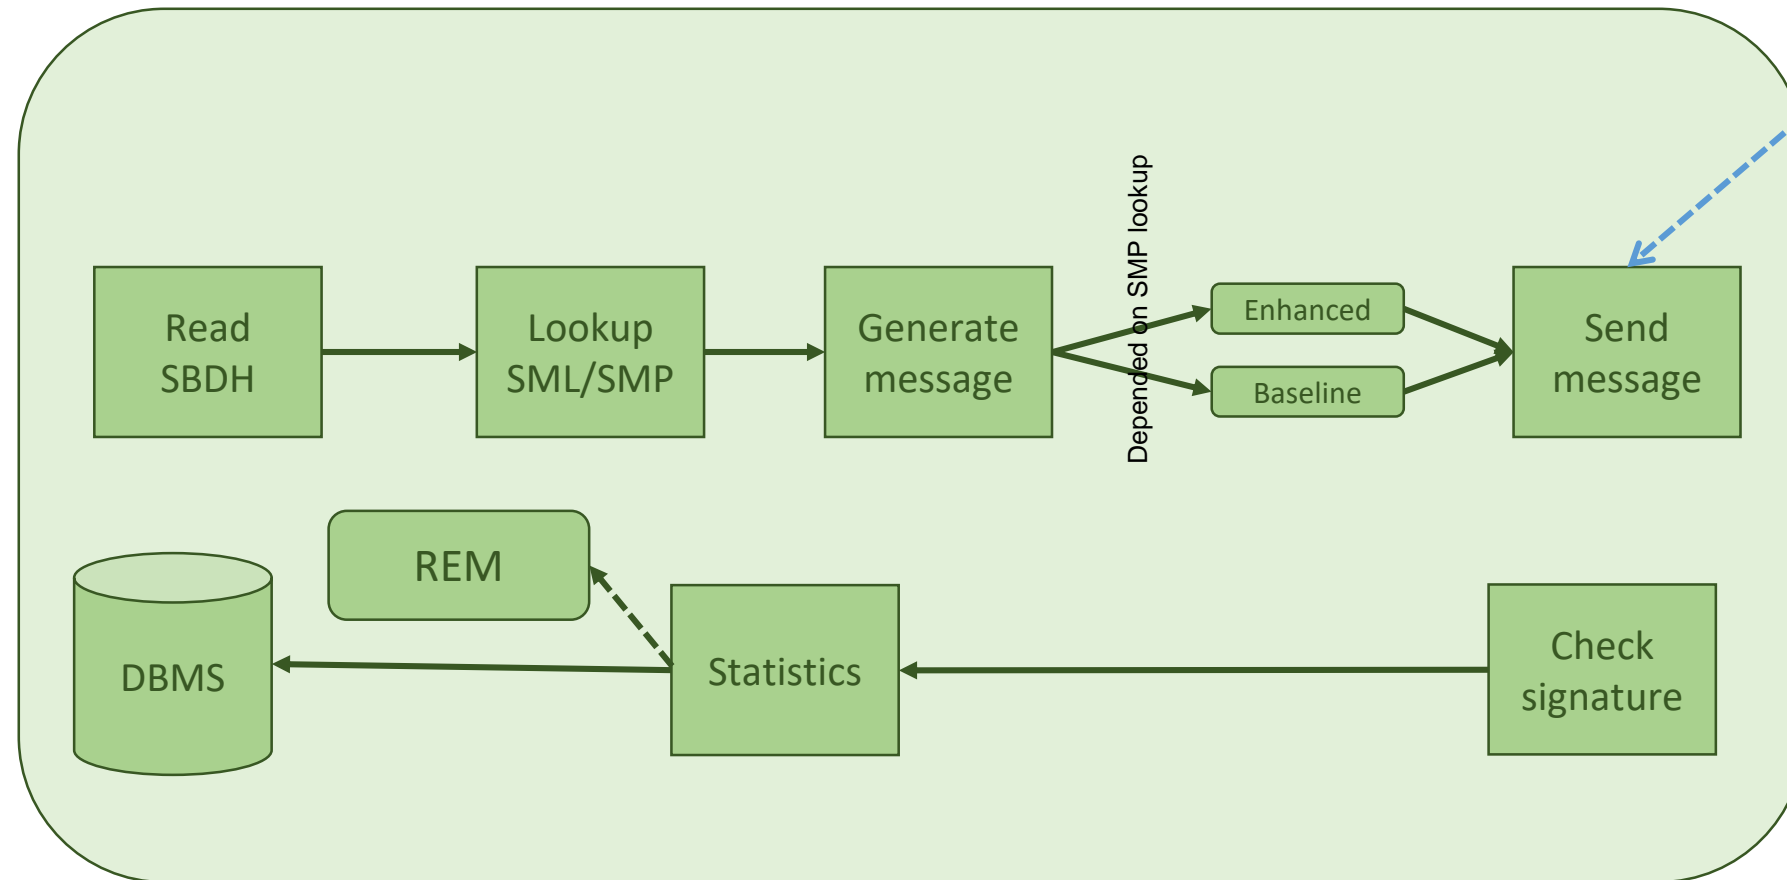

Protocol endpoint.
One for AS2 (<https://.../oxalis/AS2>)
and one for AS4 (<https://.../oxalis/AS4>)

Oxalis Outbound

Message “factories”
new extension to
support AS4

Sender

MDN
